Art Unit: 1732

1.Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-58 and 76-106, drawn to a foam article, classified in class 521, subclass 50.
- II. Claims 59-75 and 107-109, drawn to a method, classified in class 264, subclass 51.

2.The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the article as claimed can be made by another and materially different process such as one in which the article is formed by a molding method other than extrusion.

3.Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.

4.A telephone call was made to Robert Walat on November 28, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.

5.Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

6. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Allan Kuhns whose telephone number is (571) 272-1202. The examiner can normally be reached on Monday to Thursday from 7:00 to 5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Michael Colaianni, can be reached on (571) 272-1196. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
